

OFFICE OF THE DIRECTOR OF
INFORMATION TECHNOLOGY

QUARTERLY REPORT
JULY 14, 2011

1. Please begin using support@netrac.org for all questions, user adds, password changes etc. This is the only way I have to track support requests, plus they go to Shae, Victor and Kent as well in case I am out of pocket or on deployment.
2. Symposium Registration is now online – Paypal accepted, no account required
3. Disaster Tag Tuesday Participation – July 5, 2011
 - a. 58 Users Signed in as “Participated” in the 9.000 TTT Board
 - b. 23 People on the Conference Call
 - c. 31 People Logged in at peak
 - d. Please make sure multiple email addresses are on your account so you can reset your password when needed.
 - e. All conference calls are recorded and available for download on the netrac.org website under training
4. WebEOC Server infrastructure is in its final stages, and should be completed by August 1, 2011. Procedures are in place for Disaster Recovery, as well as Continuity of Operations. Our backup server is now in Lufkin Texas, and is updated in real-time, but will not be activated unless failed over. See chart below on server configurations.

NETRAC WebEOC Server Configuration
July 2011

5. Attached is a list of users sorted by position. This is not necessarily ALL of the positions assigned to a user, just one of them for sorting purposes. Please review the list in detail, take your time, and either snail mail, email or bring back in August any persons who are not active – ie quit, retired, promoted, died or don't care anymore. It was pain-staking difficult to extract the usernames and positions manually, and then sort them by hand.
6. If you need or want a WebEOC Incident for ANY event in your jurisdiction/entity, please ask and I will create one. I encourage you to use one for any event, notice or no-notice. It can be assigned just to your group if necessary. We have a server that is not used very often,

and using WebEOC for planning is a great use of it. Email support for an incident to be created for a current or future event!

7. ALL Statewide RLO's have been given login's to our WebEOC server. This will facilitate them assisting in a disaster in our area and using our server if needed.
8. WebEOC Mapper is installed and fully functional. It may also be accessed at <http://netwebeoc.org/map> as well as through WebEOC. I am also looking at setting up our own GIS server in Paris to provide GIS data to mapper since we are not able to get that information in real-time from the COG. We have a server that was at Hopkins County Hospital we could use, but have not priced the GIS Server software.
9. I encourage everyone who has not, to sign up for a DROPBOX. Dropbox.com is a file storage service in "The Cloud". It's a free service for up to 2Gb. It allows you to store commonly used files, documents, pictures etc on the internet, and be able to retrieve them from anywhere in the world, including iPhones and Android smartphones etc. Plus it allows you to share files with other Dropbox members. The link to sign up is <http://db.tt/SDX2L2d>
10. Twitter accounts – everyone should now be signed up for a twitter account, if not go to twitter.com for a free account. Be sure to follow @netwebeoc for announcements and updates. I use this to send mass notifications out about server upgrades and reboots.
11. GETAC in Austin will be broadcast Live again on ustream.com on August 19. A link will be sent out before then on how to tune in. This is great support for the trauma community.
12. Free conference calling available to all RAC members. If anyone needs to use the conference call service for your jurisdiction, the information is: Conference Dial-in Number: (209) 647-1000 Participant Access Code: 278727# and Host Access Code: 278727* (the one hosting the call). The only day it's not available is the first Tuesday of each month (TTT).

Please email me for any IT support issue you have, as well as ideas and/or suggestions for improving the technology used by NETRAC.
